

Bestbath's New Subway Tile Shower

Modern Design Meets Revolutionary Technology

Bestbath's™ new shower is the industry's first and only composite shower with the beauty and elegance of a subway tile design with 90-degree corners. This new shower has the ceramic tile appearance of a high-end shower with lower installation costs and worry-free maintenance.

Our revolutionary technology provides the sleek look of subway tile using the exclusive SnapJoint™ system. The clean, sleek aesthetic comes without the hassle of traditional installation or worry of future leaks. All this means your bathroom remodel can be faster and easier than you ever imagined.

Choose Bestbath and you'll get the ultimate in beauty and durability. You have the ability to customize the color of the tough composite structurally reinforced walls. If you want a truly custom design, you have the option to build your shower with recessed panels that you fill with your choice of tile (such as colorful glass or ceramic), giving you a design to fit your home's style and décor. Bestbath sets the standards for elegance in design.

When you see the name Bestbath it ensures you'll have a solution that will go the distance. All of our bathing products install quickly and are easy to clean and maintain, so you can spend more time enjoying your new shower or tub and less time scrubbing it.

Bestbath products are made in the USA and come with a 30-year limited warranty so you can relax knowing you're covered now and in the future.
