

ESCAPE

A wonderful bathing experience!

The Escape walk-in tub features our unique uni-body construction – one seamless composite fiberglass bowl with a luxurious gelcoat surface. The apron, tub deck and bowl are seamless, free of the worry of water leaks.

The superior strength and resistance to movement makes the door opening impervious to twisting and warping. All Bestbath® walk-in tubs offer a limited lifetime warranty.

Pre-installed plumbing with quick connect lines for professional installation.

The elegant, user-friendly patented door latch is constructed of stainless steel and brass components, no plastic. If adjustment should ever be necessary, it is easily made with this designer lever.

Jetted models feature the quietest whirlpool pump available, the Syllent Pump. This pump is designed with a heat recycling feature to help maintain water temperature and eliminate the need for an expensive in-line heater and additional wiring.

Stainless steel cable operated tub drain mechanism with a lever handle for easy operation.

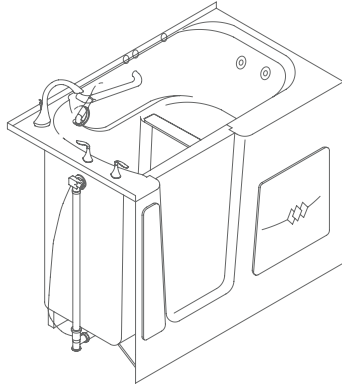

Seat warmer for added comfort.

Optional deck extension and wall surround available to complete the installation.

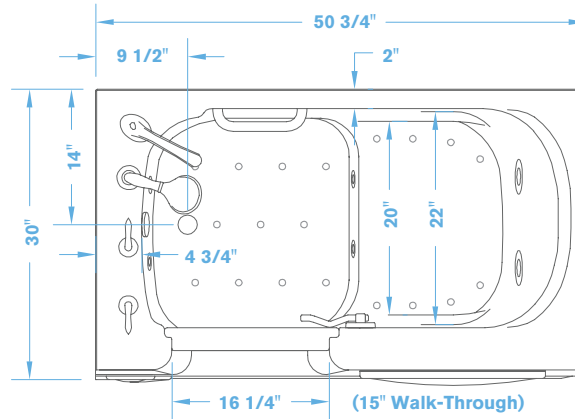

Optional ozone sanitation system available.
